

PROFESSIONAL PORTFOLIO

Alberthus Pranowo Gunawan

Mechanical & Reliability Engineer

Reliability • Maintenance • Mechanical Systems

15+ years across heavy equipment, fixed-plant equipment, mining operations and maintenance planning.

CORE VALUE

Data-driven maintenance with practical engineering.

FOCUS

Reliability improvement, maintenance strategy, failure analysis and cost control.

CONTACT

Selected profile highlights

- Experienced in maintenance planning, reliability engineering and mechanical troubleshooting.
- Hands-on exposure to rotating and fixed equipment, pumps, rotary kiln, furnace, ball mill and mobile equipment.
- Experienced with SAP PM, Pronto XI, predictive maintenance, oil analysis, vibration analysis, RCM and RCFA.
- Career progression from parts analysis and maintenance planning into reliability engineering, superintendent leadership and technical support.

Engineering reliability that performs.

Experienced Mechanical and Reliability Engineer with over 15 years in heavy equipment and fixed-plant equipment, mining operations and maintenance planning. The profile combines field engineering, maintenance strategy, reliability data and continuous improvement, with experience in SAP, SAP H4NA, Pronto XI, predictive maintenance and project commissioning.

Reliability Engineering

RCM, RCFA, historical maintenance data, reliability KPIs and predictive maintenance.

Maintenance Planning

Preventive maintenance planning, shutdown planning, forecasting, budgeting and execution.

Mechanical Systems

Rotating and fixed equipment troubleshooting, pumps, kiln, furnace, ball mill and mobile equipment.

Condition Monitoring

Oil analysis, vibration, temperature and equipment data from ECM/data link.

Maintenance Systems

SAP PM custom reports/tools, Pronto XI, equipment hierarchy and equipment health data.

Leadership & Improvement

Team leadership, engineering work packages, cost reduction and continuous improvement.

Technical toolkit

SAP PM	SAP H4NA	Pronto XI	Oil Analysis
Vibration Analysis	RCM	RCFA	Condition Monitoring
Budgeting & Cost Control	Caterpillar & Komatsu Software	Microsoft Office	Mechanical Troubleshooting

Progression from parts & planning to reliability leadership.

Technical Support Specialist PT KSB Indonesia Jan 2026 – Present Jakarta	Develop and transfer KSB maintenance programs to users; back up warranty equipment; assist field engineers with pump troubleshooting; discuss technical specifications and pump selection with users.
Mechanical Superintendent PT Merdeka Tsingshan Indonesia Feb 2023 – Dec 2025 Morowali, Central Sulawesi	Led mechanical activities for a major Acid-Iron-Metal Smelter in IMIP. Developed maintenance strategies, spare-parts inventory, PM documentation, commissioning documents and two-year maintenance budgeting. Troubleshoot rotating and fixed equipment and drove continuous improvement across mobile equipment, drill machines, slurry and chemical pumps, rotary kiln, furnace, ball mill and moistening mill.
Superintendent Maintenance Planner & Reliability PT Batutua Tembaga Raya Nov 2021 – May 2023 Wetar Island, Maluku	Managed maintenance planning and reliability team; focused on shutdown planning, failure analysis, reliability KPIs, safety investigations, continuous improvement, planning and maintenance forecasting/budgeting.
Reliability Engineer PT Merdeka Copper & Gold (Bumi Suksesindo) Sep 2019 – Oct 2021 Banyuwangi, East Java	Created Life Cycle Cost analysis, reduced maintenance costs and improved GET and undercarriage management. Built equipment hierarchy and equipment-health data; collected vibration, temperature, oil-analysis and ECM/data-link data; built KPI dashboards and predictive maintenance reporting.
Senior System Engineer PT Petrosea Tbk Jul 2016 – Aug 2019	Developed SAP PM custom reports and tools and supported planning teams across multiple sites in asset management and data accuracy.
Maintenance Planner PT Petrosea Tbk Dec 2011 – Jul 2016	Responsible for preventive maintenance planning, oil analysis and data reporting; managed mobilization for new mining projects.
Parts Analyst PT United Tractors Tbk Sep 2009 – Dec 2011 Medan, North Sumatra	Maintained inventory analysis and spare-parts optimization.

Improvement work grounded in field engineering.

Runner Up — Program Cinta Petrosea

Fuel Efficiency Improvement — Dozer D8R

Recognition as runner up in Program Cinta Petrosea for fuel-efficiency improvement on Dozer D8R. The project reflects a practical approach to operating-cost improvement and equipment efficiency.

Runner Up — BSI Innovation

GET Cost Reduction — Grader 16M

Recognition as runner up in BSI Innovation for reducing GET cost on Grader 16M by moving from Genuine to a local brand solution. The initiative demonstrates cost-focused equipment management and parts strategy.

Innovation Program — PT Merdeka Tsingshan Indonesia

Rooftop Innovation for Ball Mill

Innovation program focused on a rooftop solution for the Ball Mill area. The project is positioned as a practical plant improvement within a broader continuous-improvement portfolio.

Additional engineering workstreams

- Predictive maintenance: vibration, temperature, oil analysis and equipment data for health monitoring.
- Failure analysis: RCM database, RCFA database and historical maintenance information.
- Maintenance systems: SAP PM reporting/tools, equipment hierarchy, data accuracy and KPI dashboards.
- Planning & execution: preventive maintenance, shutdown planning, forecasting, budgeting and engineering work packages.

Note: specific financial savings, baseline values, service-life improvement and project dates were not stated in the supplied project descriptions; they can be added later for a quantified case-study version.

Formal foundation supported by applied reliability training.

Diploma (D3), Mechanical Engineering
Yogyakarta State University
2006 – 2009 | GPA 3.17

Technical High School, Automotive Engineering
SMK Pangudi Luhur Muntilan
2002 – 2005

Certifications & training

RCM (Reliability Centered Maintenance)	Relogica	2024
Internal Audit (ICAM)	PT Batutua Tembaga Raya / Intertek	2022
Machinery Failure Analysis / Root Cause Failure Analysis	IK Academy Malaysia	2019
SAP End User Program	PT Petrosea Tbk & Accenture	2014
POP & POM internal	PT Petrosea Tbk	Internal training
TOEFL ITP	Certificate score	550

Languages

Indonesian — Native | English — Good (spoken, written and reading)

Selected supporting credentials

The following certificate images are taken from the supplied CV document and included here as supporting evidence of training and professional development.

Internal Audit

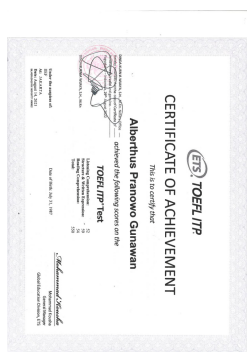

POP

Machinery Failure Analysis

RCM Introductory Course

TOEFL ITP

Professional positioning

A practical engineering profile spanning parts analysis, maintenance planning, system engineering, reliability engineering, superintendent leadership and technical support. The portfolio emphasizes reliability, maintainability, cost awareness and data-driven decision making.

Source basis

Prepared from the supplied CV and the project/innovation descriptions provided for the portfolio. No unverified project savings or performance figures have been added.
